

Privilege Escalation Log

Task ID	Technique	Target IP	Status	Outcome
010	SUIDExploit	192.168.132.129 0	Success	Success Root Shell

50-Word Summary

Local privilege escalation was successfully performed by abusing an improperly configured SUID executable identified during LinPEAS enumeration, granting root-level access. Persistence mechanisms were implemented by deploying a rogue cron task that executed a reverse shell, ensuring continued privileged access following system reboots or scheduled intervals.

Checklist

Enumeration

- ☐ Upload LinPEAS to target
- ☐ Execute LinPEAS
- ☐ Identify SUID binaries
- ☐ Note kernel version and cron jobs

Privilege Escalation

- ☐ Exploit SUID misconfiguration
- ☐ Validate root access
- ☐ Capture evidence screenshots

Persistence

- ☐ Create cron-based backdoor
- ☐ Confirm reverse shell callback
- ☐ Document persistence method
